Bilateral Meetings

- 14:00p.m. - 17:00p.m

Description

The Enterprise Europe Network brings together business support organisations from more than 60 countries. They are connected through powerful databases and know Europe inside out. What's more, they have been working together for years, some even for decades. With close to 800 member organisations (including chambers of commerce and industry, technology centres, universities and development agencies) we are always close to where your business is based.

Whichever Network contact point you get in touch with, we will either assist you on the spot or put you in touch with a specialised branch in your region even better placed to serve you. Our experts can help you find international business partners, source new technologies and receive EU funding or finance. And they can advise you on issues so diverse as intellectual property, going international, or EU law and standards. As part of participation in the Framework Programme Horizon 2020 the Enterprise Europe Network provides diagnostic services for complex corporate innovation for businesses. In the survey our consultants use a diagnostic software to assess the possibility of developing business innovation capacity and performing your services more efficiently. Based on the data of more than 4,000 European and ca. 250 Hungarian companies we place you in the right market environment.
